

From quality assured

to rest assured

As the nation's largest network of outsourcing admixture pharmacies and a leading provider of 503A and 503B compounded sterile preparations (CSPs), Central Admixture Pharmacy Services (CAPS®) understands the importance of reliable access to high-quality medications. Our team of experts is passionate about providing just that, while also simplifying your operations by reducing the risks, costs and resource demands of in-house compounding.

Above all, your patients are at the center of everything we do. And as your trusted partner, we're committed to providing the products that help them live healthier, more secure lives.

CAPS. Quality, for life.

Committed to Improvements

- Transparent Communication
- Programs and Services
- Consulting Expertise

At CAPS®, we're consistently working on our unique portfolio of products to address the most complex therapeutic uses. With a dedication to improvement, we design our patient-specific and batched, non-patient-specific CSPs to best meet critical patient needs and be compatible with the most up-to-date infusion devices.

Transparent Communication

CAPS® is committed to improving transparent communication to help address medication management planning across our products, which include:

QA customer service reports

Drug shortages

Product availability dates

New product releases

We've designed a vertical supply chain integration to address any ongoing shortages of key medications with limited commercially manufactured options.

Programs and Services

CAPSLink™

CAPSLink is the only HITRUST-certified portal, featuring a secure back-end architecture specifically designed to reduce the risk of unauthorized access to customer data. Additionally, our secure, encrypted electronic ordering system adheres to HIPAA standards for patient-specific parenteral nutrition (PN) therapy.

Our Electronic Health Record (EHR) interface is transcription-free, eliminating manual order entry, so you can have confidence in your patients' safety.

CAPS® Parenteral Nutrition Data Analytics Service

Better data can help you discover opportunities to become more efficient at your facility. Our data analytics service helps with everything from PN dosage benchmarking and operational efficiencies to identifying variables that drive ingredient waste and the options to minimize it. We use tools that can benchmark to American Society for Parenteral and Enteral Nutrition (ASPEN) recommendations and identify high-cost additive usage to optimize efficiency across prescribers, facilities and systems at the national level.

CAPS Parenteral Nutrition Training Program

Created and presented by a board-certified nutrition support pharmacist, this program focuses on the unique challenges involved in treating adult patients who need PN. The four, 60-minute interactive webinar sessions will cover topics like PN indications, drug therapies and PN formulation changes, vascular access and more. The program also includes lectures supplemented with case studies, discussion and Q&A and a competency exam at the conclusion of the training.

Consulting Expertise

CAPS ConsultingSM Services can help you navigate the complex nature of USP <797>, state regulations and FDA guidelines that require a comprehensive strategy for managing CSPs.

By evaluating your clean room processes, compounding procedures, media-fill testing and more, we help you target USP <797> and USP <800> compliance to your own facility and sterile compounding program.

Proven Quality

- Product Integrity
- Clear Labeling
- GPO Trusted

CAPS® is a national network of USP <797>-compliant 503A pharmacies and FDA-registered 503B outsourcing facilities that adhere to cGMPs. Our goal is to provide the most comprehensive and continuous quality assurance program in the industry. So you can help more patients get access to the safest, most reliable treatment possible and reassured quality for life.

Product Integrity

We prioritize the integrity of our compounded products and processes every step of the way. Our outsourcing facilities have obtained drug distributor accreditation by the National Association of Boards of Pharmacy (NABP). And, our automated electronic batch record ensures that all SOPs and applicable quality indicators are fully compliant prior to each batch release, while also improving efficiency.

Test, Hold & Release (THR®) is a key component of our quality assurance program that integrates cGMP-level end product testing with the release process for our 503B compounded drugs. This program assures that every compounded drug batch from our 503B outsourcing facilities meets strict specifications for sterility, endotoxin and potency release testing before it reaches you and your patients.

Expiration Dating

We understand the importance of expiration dating for pharmacy directors in keeping products efficiently stocked. That's why we base our expiration dates on **real-time data**. By using **stability-indicating test methods** and **container closure integrity tests**, we can ensure that each drug is appropriate for patient administration and prolong the life of your inventory.

Environmental Monitoring

The CAPS compounding clean rooms and ISO Class 5 laminar airflow hoods, workstations and zones are **monitored daily under dynamic conditions** for particulate matter air counts, bioburden air counts and surface bioburden counts.

Personnel Monitoring

All operators must successfully complete a series of media fill, glove tip monitoring and sterile sleeve tests under dynamic, worst-case conditions to participate in sterile compounding. **Each operator is retested on a routine basis.**

Clear Labeling

Our enhanced labeling system is designed to address:

- ① Institute for Safe Medication Practices (ISMP) recommendations for generic injectable medications and compounded sterile preparations, including Tall Man lettering
- ② USP medication labeling standards
- ③ The Joint Commission's National Patient Safety Goals for Medication Management
- ④ ASTM color differentiation by drug class for medications used in the operating room

GPO Trusted

We believe that good partnerships go a long way for the quality and accessibility of our products, which is why CAPS® has a long-term relationship with the largest group purchasing organizations (GPO) to ensure contract access regardless of affiliation. This helps with:

- ✓ **Potential cost savings**
- ✓ **Streamlined supply chain**
- ✓ **Regulatory compliance**

Backed by B. Braun

CAPS® is proud to be backed by B. Braun, a leader in effective pharmaceutical and medical device manufacturing, patient and provider safety and sustainable health solutions. Invested in CAPS research and development, B. Braun continuously supports our work to expand our product portfolio to meet the ever-changing needs of customers.

Together, we share a mission to double the number of patients we touch. Because when lives are on the line, providers like you should be able to get the best care for as many patients as possible.
